

FBI FUSION CENTER FRAUD

HOW THEY SET UP THEIR FAKE TARGETS ON THE FRAUD WATCHLIST FOR PROFIT

Take a “contract” from a “partner” like a corrupted Federal Agency, a criminal retired Federal manager, a MIC contractor like Lockheed Martin, or anyone with money and connections.

TWO CLASSES OF VICTIM

Personal -

I) Put a “Vengeance-for-hire contract” on a whistleblower, competitor, ex-wife, etc.
or

General -

II) cull out vulnerable, random people to fulfill (nonconsensual) bio-experiments, transhumanist experiments, medical chip experiments, requirements the military, MIC, and Bio labs - the predator class, says it needs. (The more threats, the bigger the Federal and State budget).

Study the intended victims’ backgrounds, exaggerate or just fabricate “suspicious activity” reports to create a fraudulent FISA Court request for a “surveillance warrant”. Replace surveillance equipment with high tech weapons - the FISA Court will pretend It does not know the difference. Renew warrant endlessly on feeble grounds for the life of the target. (No prosecution Intended or the intended fraud would be revealed and all targets must be discredited and die to get rid of witnesses).

Prime the innocent target (scapegoat) by covertly injecting them with a GPS chip, three triangulation chips for constant brain targeting, various medical chips to degrade their physical health and nanotech to enhance the suffering and damage the electromagnetic weapons cause going through them.

Covert pre-targeting insertion methods:

a) knock victim out (can utilize frequencies or gas or drugs in food), enter house, insert chip tech;

b) hijack opportunistic medical procedures with DHS friendly (sell-out) doctors;

c) cause an accident or medical emergency to get a specific target into a DHS friendly hospital. (Raytheon’s Raven’s Claw device can target any organ by frequency. It can mimic a kidney stone episode, get nano secretly into the victim via an IV supposedly for pain.)

Prepare victim’s neighborhood: send FBI/Fusion Center officials (can be law enforcement) to fear and hate monger among neighbors first, later throughout the town. Fabricate a story about “how very dangerous” the intended victim is, despite no real indications of such ever. Fabricate a story (false dossier) about how authorities can’t quite get enough evidence on the person to follow due process and publicly prosecute him/her, so they will side-step the Constitution to opt for 24/7 rotating stalking harassment, with the use of secret high tech weapons to slow-kill (murder) him/her in such a way it looks like natural causes (or is presented that way by corrupted coroners). Problem solved, no mess, no fuss, according to

authorities (who are actually covering up for other corrupt authorities by secretly murdering witnesses and victims *under color of law*).

Monetary Incentive:

If that claim of authority does not convince civilians to help or just stay quiet, monetary incentives are available to a) line-of-sight neighbors to aim weapons at the target 24/7; b) vehicular stalkers on stand-by to follow him/her driving or running errands, or visiting friends/family, to hit him/her with car-based weapons during the drive (also hitting others around him as collateral damage), to hit the location he/she is in with three cars triangulating weapons into the location, be it a doctor's office, store, school, day-care, friend's or family member's home - collateral damage of no concern, of course. (Weapons can stop pacemakers, cause strokes, and otherwise harm others in delicate health, if exposed long enough). And c) passive stalkers (see below).

Threats:

If monetary incentives (gift cards, services, products, or even illicit drugs, etc.) are not enough to buy off civilians, threats of arrest for talking about the "secret" operation are made. Same with professionals like doctors, nurses, real estate brokers, car mechanics, etc. who are "persuaded" to do less than a competent job for such a target so the person is always sabotaged.

Active and Passive stalkers:

Active stalkers are put on schedules and paid gift cards accordingly but passive stalkers know they will receive a \$100 sighting confirmation credit on "their account" on an app affiliated with neighborhood watch and/or the State Fusion Center, hosted by GitHub.

Civilians can earn extra by setting up the target either by provoking an incident to report to police, falsely reporting an incident as occurring but did not (false witness), or causing a car accident, or harming a pet, etc. Often the nastier harassment is given to those with criminal histories. They may earn gift cards, recreational drugs, or get leniency from previous crimes.

There you have the Targeted Individual program aka the Watchlist scam in a nutshell, corrupt officials, framing and creating non-existent "terrorist threats" out of the people they are supposed to protect, simultaneously training a secret psychopath army hidden in society, to torture and murder decent, law-abiding Americans for fraudulently attained and money-laundered tax dollars, for a fraud Police State.

Oh, and it has been reported that there is a kill bonus pay-off on any target. Suicide is apparently a highly coveted result.

This all will have to be part of a state by state, national audit and investigation of everyone affiliated with DHS FBI FUSION CENTERS and their affiliates and minions. Insurrection, sedition, treason will be the main focus along with human trafficking, conspiracy to torture and conspiracy to murder.

DEFUND AND AUDIT DHS FBI FUSION CENTER NOW!

FALSE CLAIMS OF CLASSIFICATION (HOMELAND SECURITY CONCERNS) MADE MERELY TO HIDE CRIMINAL ACTIVITY ARE A FEDERAL FELONY.
